PRESS RELEASE

It's time to get your parts inventory AMPed up!

Beaverton, MI (March 23, 2026) – BMG is a global leader in full-service thermoforming packaging and automation technology. This group of highly skilled personnel has historically been the leader in developing and manufacturing industry-changing improvements across the entire thermoforming end-to-end process, benefiting plastic and paper products manufacturers for years. BMG continues to engineer innovations that provide its customers with world-class technology solutions, shorter developmental lead times, and outstanding executional design flexibility.

Whether it's parts, maintenance, or upgrades, BMG's AMP program gets you prepared for the future.

Whatever the need, BMG's AMP parts Program can fill the bill. They take pride in accommodating the needs of a full spectrum of clients, from entry-level to custom solutions, offering precisely what their clients need for wear items and replacement parts. In today's circular economy, the need to be up and running is tantamount to success in the market. Any delays in parts result in downtime and make it difficult to meet deadlines. Consumers' wants and needs regarding parts availability drive the need to keep a generous supply of parts on hand to solve problems as quickly as possible. The BMG AMP program does just that, creating solutions and deliverable timelines that help clients get back up and running asap.

BMG has over 70 years of development and executional expertise across many verticals that touch a multitude of end users. Their specialists know clients' needs and the parts necessary to meet their thermoforming and maintenance needs. Take a moment to review their offerings at [OneBMG.com](https://www.onebmg.com).

Maintenance Kits: be proactive and save the day.

Being the solution ahead of the storm is the name of the game. Performing preventative maintenance is easy when you have all the parts you need. BMG knows that one of the biggest hurdles in modern-day manufacturing is eliminating downtime. Sometimes, this is difficult to avoid. BMG can help you maintain a well-stocked inventory of essential wear items on your shelves through their AMP parts program, so you can be the hero in keeping everything up and running in a fast-paced thermoforming production environment. Planning and executing preventive measures can keep you and your equipment out of harm's way, and getting that process to work for you means keeping what you need within arm's reach. Get what you need now from BMG's new AMP parts program, a global network of parts supplies. At BMG, their goal is to help you minimize your downtime by getting you the parts you need as quickly as possible. They carry one of the largest parts inventories in the world.

AMP Program Replacement Parts: if you need it, they probably have it.

Whether it's something BMG has manufactured or whether someone else has supplied you with technology, BMG can help you out. On the subject of maintenance, service, and parts, one of BMG's most significant accomplishments this year was the creation of its AMP Parts Program, which improves client access to its worldwide inventory of replacement parts. BMG will be warehousing a vast array of

PRESS RELEASE

replacement wear items and hard-to-find replacement parts. To date, they have launched the most replacement products in the industry. They like to tell their partners that if you need it, they have it; if they don't, they will engineer and make it. It's all about keeping their clients up and running 24/7/365. Whether you're working with old or new equipment, BMG can get you whatever you need to do the job right!

"We bring more experience, innovation, customer service, and technical support than any other company in the US or the world, for that matter. Part of that support program is to have the parts clients need when they need them. The AMP program provides the parts inventory and service information they need to get the job done right. The experts who make up BMG are the best in their fields and have seen it all. If our customers have a question? We have the answer," said BMG VP of Global Marketing and Product Strategy Collin Sullivan.

To lead an industry, you have to drive technological advancements that keep production up and running so manufacturers can satisfy their customers. Incredible market growth and key indicators have paved the way for BMG to introduce an enhanced parts Inventory program (AMP) that will put wear items and some custom parts within reach when time is of the essence. These parts will be available to anyone who needs them and can be pulled and shipped within 24 hrs across all sectors, including food, medical, electronics, horticulture, and general packaging. Be sure to visit their website at oneBMG.com to explore and learn more about their AMP Program. Advancements in process engineering have enabled BMG to create this new functionality, which should significantly reduce downtime in your production.

BMG remains steadfast in its dedication to supporting customers seeking thermoforming packaging and automation solutions. With a keen focus on detail, BMG delivers comprehensive end-to-end solutions that prioritize shorter development timelines, enhanced ROI, reduced operational costs, and an unmatched global service commitment.

BMG. Shaping Next.
