PRESS RELEASE

September 6, 2023

Sustainable Paper Packaging that's Formable, Stackable, and Can Hold Your Soup!

Beaverton, MI (September 6, 2023) – Brown Machine Group is now BMG, a global leader in full-service thermoforming packaging and automation technology. This group of highly skilled personnel has historically been the leader in the development and manufacturing of industry-changing improvements for the entire thermoforming end-to-end processes, which has for years benefitted manufacturers of packaging products. BMG continues to engineer innovations that provide its customers with world-class end-to-end solutions, shorter developmental lead times, and outstanding executional design flexibility.

Sometimes, it's a unique need that drives advancement toward change. If you've been transitioning from plastic to paper for sustainability reasons but have been able to make any headway, searching for a plastic tray replacement that is economical, has great tensile strength, is versatile, and has excellent sealability. BMG has exactly what you've been in search of.

That's right, it's even waterproof.

Resilient and waterproof, they say you can make a boat out of this thermoformed paper tray and sail the seven seas, but for now, BMG is offering it up as a sustainable and strong vessel for food that will soon be taking the industry by storm. But, if you want to make a boat out of it, they can help you also. Stop by BMG's booth #4742 at the Pack Expo in Las Vegas, Sept. 11-13, 2023, and discover the how and why of their new paper tray packaging innovation. You won't want to miss this. The cat will be out of the bag after the show, and everyone will want it.

"This new BMG Paper Tray solution is an incredible alternative to plastic trays, and they are fully sustainable. We are offering a unique solution to our customers who have been searching for a while to find a more eco-friendly option when it comes to packaging food," said BMG CCO Jake Kowalewski.

To be a leader in the thermoforming industry, you have to create technological advancements that allow manufacturers down the line to offer unique solutions for their customers. Out of this need comes thought-provoking ideas that can change an industry and ultimately benefit the consumer at large. This is where BMG has excelled for the last 40 years, constantly creating change that matters.

ABOUT BMG

Headquartered in Beaverton, Michigan, USA. The new BMG is an award-winning thermoforming packaging/automation solutions leader focused on a customer-centric approach. We develop solutions that meet and exceed the unique requirements of each customer's application. BMG is a global organization representing the world's most extensive thermoforming portfolio, with international assistance available 24 hours a day. Operating

in major verticals that include automotive, medical, electronics, horticulture, food, and process automation, we bring to bear on each solution over 50 years of technological experience! BMG operates facilities and offices throughout North America, South America, Europe, the UK, Asia, and the Middle East. **Learn more at oneBMG.com, follow @wearebmg on Threads, follow @oneBMG on LinkedIn, and like @oneBMG on Facebook.**

PRESS RELEASE

This new patented BMG Paper Tray solution is part of BMG's continued efforts to bring improved processes and products to market for its manufacturing customers. This new advancement will turn the processed food industry upside down. Advances in technology and new patents like this are leading the thermoforming industry to significant improvements in fit sustainability, all driven by BMG's engineering process improvements.

"This new Paper Tray fits our focus to be more sustainable in our product offerings. One of our main drivers in engineering new manufacturing solutions is to constantly allow for production improvements and sustainable applications to see how we can assist customers in reducing their carbon footprint, address their sustainability concerns for the future, and manufacture smarter," said BMG CEO Kobin Miceli.

BMG continues its commitment to assisting customers in need of thermoforming packaging/automation solutions with an acute awareness and attention to detail when it comes to providing these end-to-end solutions while taking into account the need for shorter developmental timelines, increased ROI, reduced cost of doing business, and an unparalleled service commitment rivaled by none worldwide.
