# PRESS RELEASE

May 14, 2025

## **BMG provides turnkey solutions from start to finish and beyond.**

Beaverton, MI (May 14, 2025) – BMG is a global leader in full-service thermoforming packaging and automation technology. This group of highly skilled personnel has historically been the leader in the development and manufacturing of industry-changing improvements for the entire thermoforming end-to-end processes, which has benefited manufacturers of packaging products for years. BMG continues to engineer innovations that provide its customers with world-class end-to-end solutions, shorter developmental lead times, and outstanding executional design flexibility.

## **No matter what the ask, BMG has the answer.**

Whatever the need, BMG can fill the bill. They take pride in being able to accommodate the needs of a full spectrum of clients from entry level all the way through to custom solutions in order to offer precisely what their clients might need and when they need it. In today's circular economy, the wants and needs of consumers drive the need and have to be met with functional, turnkey solutions and deliverable timelines. When they say turnkey, BMG means it; they design, manufacture, install, train, maintain, and service everything from yours to theirs, and even the competition's. You no longer have to run around communicating with several companies to address your needs and issues. It just takes one call to one company, to one person, and BMG will get the job done no matter what the need.

BMG has over 110 years of developmental and executional expertise in many different verticals that touch many end users. This knowledge is second to none in the industry and allows them to say they are a "turnkey manufacturer." Their specialists know your needs and the equipment necessary to meet your thermoforming goals. Take a moment to review their offerings at [OneBMG.com](http://OneBMG.com).

"We bring more design experience, engineering innovation, customer service, and technical support than any other company in the US or the world, for that matter. The experts who make up BMG are the best in their fields and have seen it all. If our customers have a question? We have the answer," said BMG CCO, CIO Jake Kowalewski.

## **BMG has you covered.**

Being a turnkey manufacturer has many different sides to it. One of the most critical topics is whether customers will get the support they need throughout the entire life of their technology from BMG. The short answer is yes, no matter where you are in the world, they are available for whatever it takes to get the job done. The truth of the matter is that a lot of companies say they can provide turnkey solutions at the highest level anywhere on the globe, but BMG has proven it time and time again. BMG offers support in over 85 countries worldwide. They pride themselves on reacting to situations anywhere in the world at any time, day or night, to ensure their customers have what they need, when they need it, and where they need it. This helps their customers succeed in their mission to produce the best thermoformed products possible for their customers.

## PRESS RELEASE

24/7/365, it's not just a data point. It's an expression of the support that BMG holds near and dear to their hearts. They believe that they form a bond with their clients and offer them anything and everything when it comes to working out applicable solutions that fit their exact needs. They don't just design, engineer, manufacture, and sell; they are with their customers as a partner through the entire life cycle of their manufacturing process, planning, installation, and execution, including the maintenance of their technology long-term. They want their customers' success to be their success as well.

### **Remote training on select BMG products.**

Building success with their customers means finding new ways for BMG to provide exceptional services and training. They are pleased to offer instructor-led training classes that allow clients to gain critical knowledge for maintenance oversight and execution. They aim to enhance customers' opportunities to learn new skills and further their thermoforming capabilities and expertise. The goal of this training is to educate clients' employees with the most up-to-date training that they can provide. BMG is constantly evolving and looking for better ways to help maintenance teams optimize production.
