ComPack Series

ComPack Series Case Packer

Saves time, space & labor costs

The NAS ComPack Series™ Case Packer provides modern ingenuity in a compact footprint focused on maximizing your return on investment. Understanding the value of available floor space, the Case Packer is designed to erect cases and pack product sequentially within the same machine. The unit is designed to handle a wide range of products produced from either plastic or paper with user friendly controls and available in top and/or side load or fed from multiple lanes. The Case Packer can be configured with a host of options to meet your end-of-line needs, providing the ultimate reduction in floor space, labor costs and production time.

Maximize your return on investment with solutions from BMG.
